Introduction

ShareLife is a web-based Blood Donor Management System developed to connect blood donors with people in need.

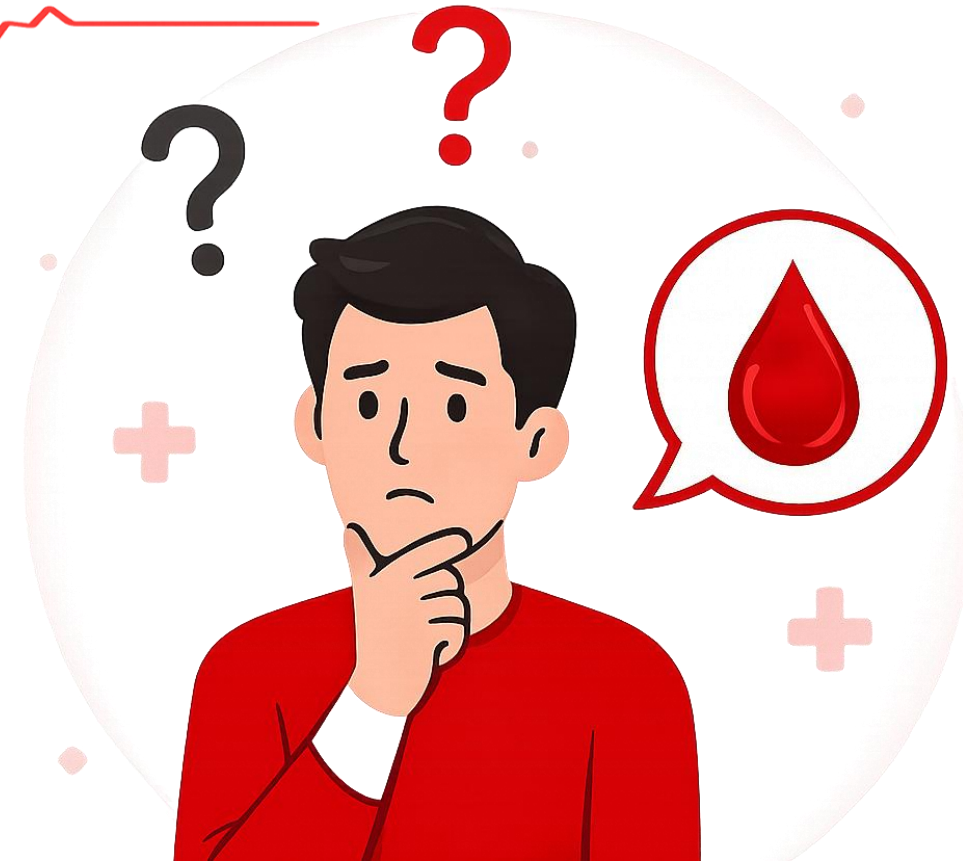

The system enables donor registration, blood group search, and centralized donor record management, making blood availability faster during emergencies.

Problem Statement

- Difficulty in finding blood donors during emergencies.
- Donor information is often stored manually.
- Searching for the required blood group takes time.
- Lack of a centralized donor database.
- Communication between donors and beneficiaries is inefficient.

Solution

ShareLife provides a simple online platform to:

- Register blood donors.
- Store donor information securely.
- Search donors by blood group.
- Display available donors instantly.
- Manage donor records efficiently.

Objectives

- Register blood donors online.
- Maintain a centralized donor database.
- Enable quick blood group search.
- Improve emergency blood availability.
- Provide an easy-to-use system for users.

Features

**Donor
Registration**

**Search
Donor**

**View All

System Workflow

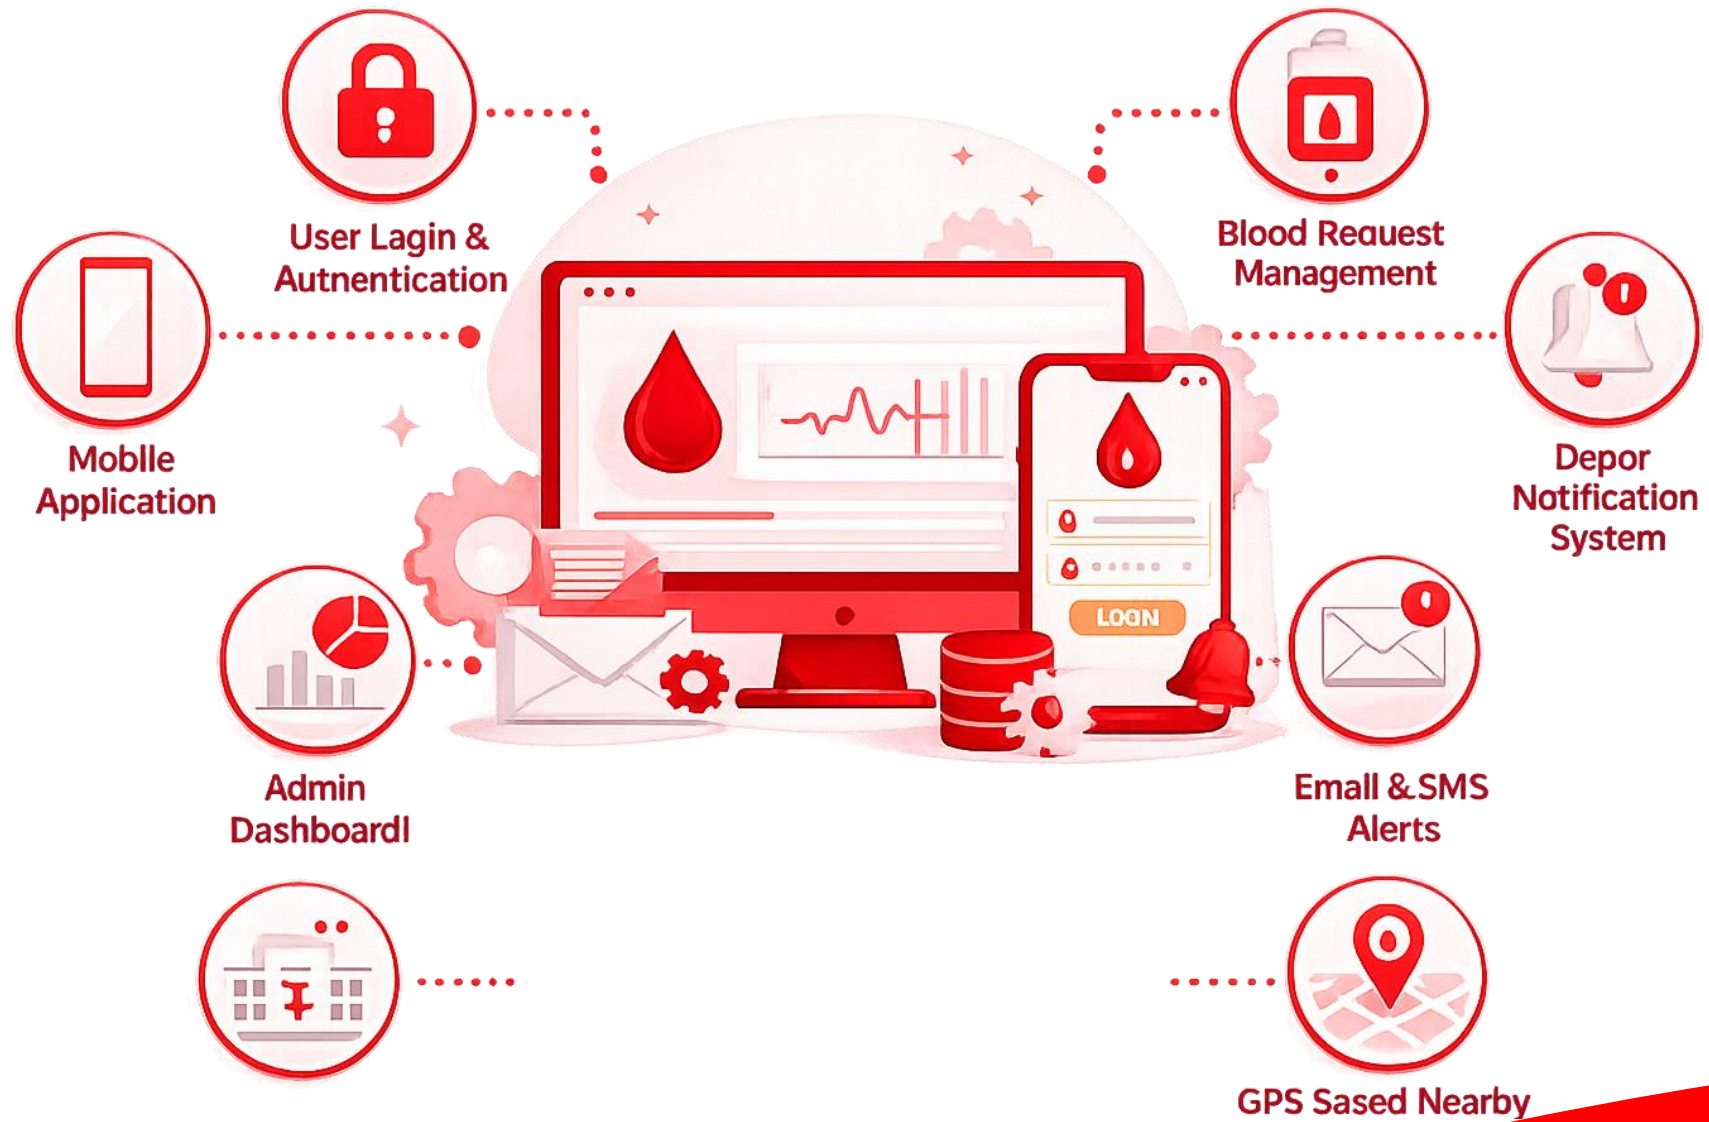

Advantages

- Easy donor registration.
- Fast blood group search.
- Centralized donor management.
- User-friendly interface.
- Saves time during emergencies.
- Reliable donor information.

FUTURE ENHANCEMENTS

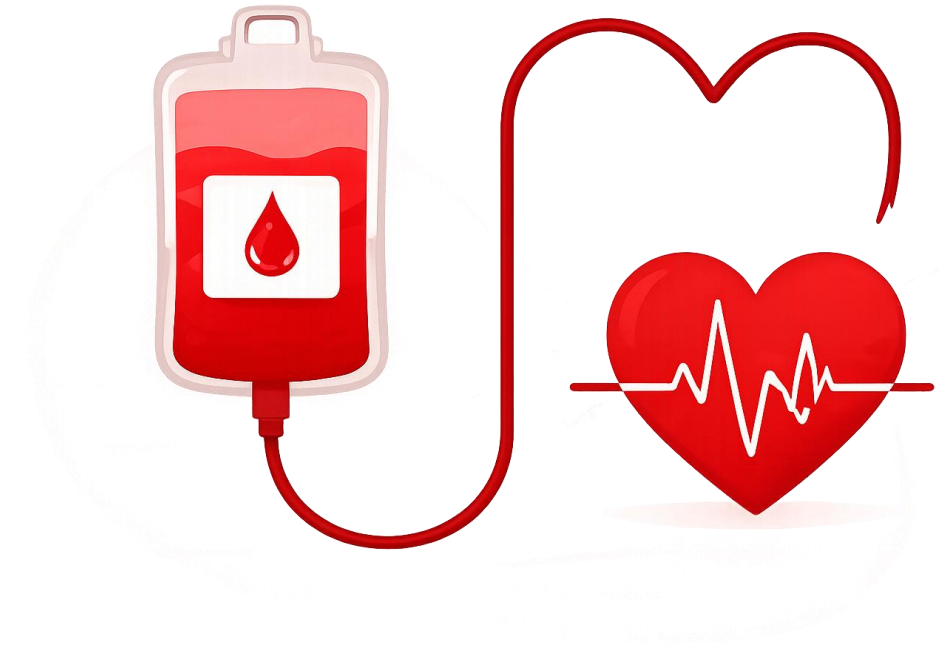

Conclusion

ShareLife is a simple and efficient Blood Donor Management System developed using ASP.NET Web Forms, C#, SQL Server, and ADO.NET.

The application helps users register donors, search donors by blood group, and manage donor information efficiently, making blood donation faster and more organized during emergencies.

Thankyou
